

YOUR VERY OWN PAWDOMETER

PAWGUST

INSTRUCTIONS FOR USE

- 1** Follow the set up steps in the instruction manual that comes with the PAWdometer.

you will see other important information like distance, time, speed, memory etc.
- 2** Before your PAWGUST walk, attach the PAWdometer to your dog's collar or lead using either of the two rings provided.
- 3** **Caring for your PAWdometer:**
PAWlease be careful as the PAWdometer is not waterproof.

The small ring on the back of the PAWdometer can be fragile, especially if pulled.

If the PAWdometer hangs too low on your dog, or to prevent damage, you can attach the PAWdometer to the lead's handle.

During the month of August, why not keep your PAWdometer attached to your lead to remove the extra handling from taking it on and off daily.
- 4** You'll be able to see the steps on the first screen and as you press through the 'mode' function,
- 5** Once you're home from your PAWGUST walk, remove the PAWdometer. DO NOT keep the PAWdometer on your dog outside of your walks. Please refer to warning label on the PAWdometer packaging.
- 6** Check your PAWdometer and take note of the amount of steps you have done and the time.
- 7** Login to your PAWGUST dashboard and go to 'Log My Walk/Run'.
Scroll down to 'Fitness Activity'.
- 8** Input the date, duration, PAWs stepped and distance and click 'Log Activity'. This will log your activity which will now display on your PAWGUST Page!

Note: the PAWdometer resets back to zero every day.

HAPPY WALKING!
